

Compliance Review Toolkit for Legal Teams

Legal review framework covering hallucination risk assessment, jurisdictional ad compliance, brand claim validation workflow, and pre-publication approval guidance for AI marketing.

4 FRAMEWORKS

LEGAL · COMPLIANCE

LIGHT GATE

2026 EDITION

Who this toolkit is for

General Counsel, Chief Compliance Officers, legal reviewers, and compliance managers who need a structured framework for reviewing AI-generated marketing content before publication. Designed for use alongside ZoikoVertex governed approval workflows.

FRAMEWORK 1

AI Hallucination Risk Assessment

Use this checklist when reviewing AI-generated content for factual accuracy, unsupported claims, and fabricated references before legal sign-off.

A • Factual Claim Verification

- ✓ All statistical claims are sourced and the source is verifiable, not AI-generated.
- ✓ Named third-party endorsements, awards, or certifications have been confirmed with the issuing body.
- ✓ Product performance claims are substantiated by internal data, test results, or published research.
- ✓ Regulatory approval claims (e.g. "FDA cleared", "FCA authorised") are confirmed current and in-scope.
- Comparative claims against named competitors are supported by independent evidence.
- ✓ Pricing claims reflect actual current pricing — no AI-generated placeholder values.
- ✓ Date-sensitive claims (e.g. "market-leading since...") are confirmed accurate at time of publication.

B • Reference and Citation Integrity

- ✓ All cited studies, reports, or publications have been retrieved and verified as real documents.
- ✓ Author names, publication dates, and titles in citations match the actual source.
- ✓ Statistics attributed to named organisations have been confirmed from the named organisation's published output.
- ✓ No AI-generated placeholder citations (e.g. "Source: Industry Report 2024") without verified backing.
- Case study claims (client names, results, timelines) have been confirmed with the named client.

C • Risk Severity Classification

Risk Level	Trigger Condition	Required Action	Publication Gate
Critical	False regulatory claim, fabricated endorsement, or unsubstantiated comparative claim	Block publication until legal review is complete	Hard block
High	Unverified comparative claim or performance claim	Hold for substantiation or legal review	Hold until cleared
Medium	Statistical claim with source not yet confirmed	Flag for sourcing. Reviewer note required.	Conditional approval
Low	Minor factual imprecision not material to purchase decision	Case decision recommended. Record in Decision Log	Approve with note

FRAMEWORK 2

Jurisdictional Advertising Compliance Checklist

Apply the relevant jurisdiction block(s) to every campaign before activation. Each block covers the primary legal compliance requirements for that market.

UK (ASA / CAP Code / FCA)

- ✓ Advertisement is obviously identifiable as an ad — "Ad", "Sponsored", or "Promoted" label present where required.
- ✓ No misleading omissions — all material conditions, exclusions, and qualifications are disclosed.
- ✓ Pricing claims include VAT and all mandatory fees where applicable.
- ✓ Financial promotions: fair and balanced, risk warning present, FCA approval confirmed if required.
- ✓ Comparative advertising claims are accurate, verifiable, and not denigrating.
- ✓ Environmental/sustainability claims are substantiated — no vague "eco-friendly" or "green" without evidence.
- ✓ Testimonials and reviews are genuine, representative, and consent confirmed.

EU / EEA (GDPR, EU AI Act, Consumer Rights Directive)

- ✓ AI-generated content disclosed where required under EU AI Act obligations for the deployment context.
- ✓ Personal data used for ad targeting has a confirmed lawful basis and is documented in ROPA.
- ✓ No dark patterns in consumer-facing content — pricing, terms, and cancellation clearly presented.
- ✓ Distance selling disclosures present for e-commerce: right of withdrawal, contact details, total cost.
- ✓ Cookie consent obtained before any tracking-based personalisation is applied.
- ✓ Language requirements met — primary language of target member state used for material terms.

US (FTC Guidelines / State Consumer Protection)

- ✓ Endorsements and testimonials comply with FTC endorsement guides — material connections disclosed.
- ✓ "Results not typical" or substantiation for typical results present where testimonial claims results.
- ✓ No deceptive pricing — "was/now" pricing based on genuine prior price held for reasonable period.
- ✓ CCPA: California consumers' data sale opt-out mechanism in place where applicable.
- ✓ CAN-SPAM: commercial email includes opt-out, physical address, no deceptive subject lines.
- ✓ State-level health product claim restrictions reviewed for applicable distribution states.

FRAMEWORK 3

Brand Claim Validation Workflow

Step-by-step legal workflow for validating marketing claims in AI-generated content. Complete all steps before granting legal approval in the ZoikoVertex Decision Ledger.

Step	Action	Owner	Output
1	Identify all claims in the content — factual, comparative, performance, regulatory, and promotional.	Legal reviewer	Day and date of this asset
2	Classify each claim by type and risk level using the legal review risk matrix (Risk classified).	Legal reviewer	(Risk classified) claims list
3	Verify substantiation for all Critical and High claims. Hold/Compilation until completion.	Legal reviewer	Substantiation record per claim
4	Apply jurisdictional compliance checklist (Framework 2) for each target market.	Legal reviewer	Jurisdiction sign-off
5	Review brand voice compliance: tone, terminology, and approved claim language per brand guidelines.	Brand manager	Brand compliance guidelines.
6	Record legal approval decision with rationale in ZoikoVertex Decision Ledger.	Legal reviewer	Decision Ledger entry
7	Confirm evidence package sealed in Evidence Vault before publication authorization.	Legal reviewer	Evidence Vault confirmation

FRAMEWORK 4

Pre-Publication Legal Approval Guide

Final sign-off checklist before any AI-generated campaign content is authorised for channel publication.

- ✓ All hallucination risk items (Framework 1) completed and Critical/High items cleared.
- ✓ Jurisdictional compliance checklist (Framework 2) completed for all target markets.
- ✓ Brand claim validation workflow (Framework 3) completed and substantiation records filed.
- ✓ Legal reviewer identity confirmed in the ZoikoVertex Identity Ledger for this approval.
- ✓ Decision rationale entered in the Decision Ledger — not just approval status.
- ✓ Any override of a policy trigger has documented authority basis and risk acceptance.
- ✓ Evidence Vault package sealed: AI prompt, output, all check results, legal approval confirmation.
- ✓ Channel-specific compliance confirmed: platform advertising policy, format rules, disclosure requirements.
- ✓ Regulated content categories (financial, health, legal, environmental) have category-specific sign-off.
- Post-publication monitoring protocol confirmed if content contains time-sensitive or regulated claims.

Legal disclaimer

This toolkit provides a structured framework for legal and compliance review of AI-generated marketing content. It does not constitute legal advice and does not replace qualified legal counsel review. Specific obligations depend on your organisation's jurisdiction, industry, customer base, and regulatory context. Contact governance@zoikoververtex.com for implementation support.
