

ROI Attribution Measurement Toolkit

Board-ready ROI reporting templates, multi-touch attribution methodology guide, contribution margin tracking framework, and CFO brief template for governed AI marketing.

4 TEMPLATES

CMO · CFO · BOARD

UNGATED

2026 EDITION

How to use this toolkit

This toolkit contains four components: (1) the ROI measurement framework with 7 levers, (2) multi-touch attribution methodology guide, (3) contribution margin tracking template, and (4) a CFO brief template. Complete each template for your organisation and present together as your governed AI marketing business case.

TEMPLATE 1

Governed AI Marketing ROI Framework — 7 Levers

Complete the Baseline, Target, and Measurement Method columns for your organisation. The ZoikoVertex ROI Engine tracks actuals against targets automatically once deployed.

ROI Lever	What it measures	Baseline	Target	Measurement method
Campaign throughput	Campaigns produced per team <u>per quarter</u>	_____	_____	ZoikoVertex workflow completions
Approval cycle-time	Avg days from brief submission to <u>approval</u>	_____	_____	ZoikoVertex SLA timer data
Rework reduction	Revision rounds per campaign (<u>avg</u>) _____	_____	_____	Revision events in Audit Trail
Agency efficiency	Brief-to-delivery days for external <u>agencies</u>	_____	_____	Agency workspace cycle-time
Risk reduction	Compliance incidents per 100 <u>campaigns</u>	_____	_____	Policy trigger + escalation rate
Time-to-market	Days from campaign brief to first <u>publication</u>	_____	_____	Brief creation to publish event
Governance maturity	Evidence completeness % across <u>campaigns</u>	_____	_____	Audit Engine coverage score

Benchmark targets

ZoikoVertex enterprise customers typically achieve: throughput +25–40%, approval cycle-time –40–65%, rework reduction –30–60%, risk incidents –50–80%, time-to-market –25–45% in the first 90 days of deployment.

TEMPLATE 2

Multi-Touch Attribution Methodology Guide

Select and configure the attribution model appropriate for your marketing mix and reporting requirements. ZoikoVertex campaign evidence records provide the event-level data required for each model.

Model	Best for	Credit distribution	Data requirement	ZoikoVertex evidence used
Last touch	Direct response, short cycle	100% to final touchpoint	Channel conversion data	Publish event + conversion ref
First touch	Brand awareness, top-of-funnel	100% to first touchpoint	Entry channel data	Campaign brief + first activation
Linear	Multi-channel nurture program	Equal across all touchpoints	Full journey data	All activation events per campaign
Time decay	Long sales cycles, B2B	More to recent touchpoints	Timestamped journey	Audit Trail event timestamps
Position-based	Lead gen + conversion focus	40/20/40 first/mid/last	Full journey + conversion	Full Audit Trail + conversion link
Data-driven	High-volume, ML-capable	Algorithmic, varies by path	Large conversion dataset	Audit Trail export to BI tool

Attribution configuration checklist:

- Attribution window defined: click-through window ____ days, view-through window ____ days.
- Cross-device tracking methodology confirmed and GDPR consent basis documented.
- Offline conversion integration in place (CRM, in-store, call centre) where applicable.
- Revenue attribution currency and exchange rate policy defined for multi-market campaigns.
- Attribution model reviewed and approved by CFO or Finance Director before board reporting.
- Model consistency: same attribution methodology used across all campaign performance reports.
- ZoikoVertex Audit Trail event export connected to BI/attribution platform (Looker/Power BI/GA4).

TEMPLATE 3

Contribution Margin Tracking Template

Complete this template per campaign or campaign type. Contribution margin = Revenue attributed – Variable marketing costs. This metric is the CFO-preferred measure of campaign-level profitability.

Line item	Q1 Actual	Q2 Actual	Q3 Target	Notes
Gross revenue attributed	£_____	£_____	£_____	Per attribution model above
Returns / refunds	£_____	£_____	£_____	Deduct from gross
Net revenue attributed	£_____	£_____	£_____	Auto: Gross – Returns
Media spend	£_____	£_____	£_____	Paid media by channel
Agency / production fees	£_____	£_____	£_____	ZoikoVertex licence included
Content creation cost	£_____	£_____	£_____	AI + human time cost
Approval / review cost	£_____	£_____	£_____	Internal reviewer hours × rate
Total variable marketing cost	£_____	£_____	£_____	Sum of cost lines
Contribution margin (£)	£_____	£_____	£_____	Net revenue – Total cost
Contribution margin (%)	_____%	_____%	_____%	CM£ ÷ Net revenue
Return on ad spend (ROAS)	____x	____x	____x	Net revenue ÷ Media spend

Governance cost tracking

Include ZoikoVertex licence, internal reviewer time, and approval workflow overhead in the "Approval / review cost" line. ZoikoVertex customers typically see approval cost per campaign decrease by 40–60% within 90 days as workflows and SLA routing mature.

TEMPLATE 4

CFO Brief Template — Governed AI Marketing Investment

Complete and present this brief to your CFO or Finance Director when requesting budget approval for ZoikoVertex. Replace bracketed placeholders with your figures.

Investment summary

We are requesting approval for [AMOUNT] annual investment in ZoikoVertex — a governed AI marketing execution platform. This investment covers [SEATS] user licences, enterprise onboarding, and [INTEGRATIONS] platform integrations across [CHANNELS] marketing channels.

Financial case: three primary ROI levers

Lever 1 — Throughput: Current campaign output is [X] campaigns per quarter with [Y] headcount. ZoikoVertex is projected to deliver [X+N] campaigns with the same team, valued at [VALUE]. Lever 2 — Approval cycle-time: Current brief-to-approval time is [X] days. Projected reduction to [Y] days saves [Z] hours per campaign across [N] campaigns per quarter. Lever 3 — Risk reduction: [N] compliance incidents in the past 12 months at an estimated cost of [COST] per incident. Projected 60%+

incident reduction = [SAVING] annual saving.

Payback period

Total annual cost: [LICENCE + INTEGRATION + ONBOARDING]. Total projected annual benefit: [THROUGHPUT VALUE + CYCLE-TIME SAVING + RISK SAVING]. Projected payback period: [X] months. Year 1 net benefit: [BENEFIT – COST]. Year 2 net benefit (no onboarding): [HIGHER FIGURE].

Governance and risk case

ZoikoVertex provides the audit evidence, approval records, and compliance documentation that uncontrolled AI marketing cannot. In the event of a regulatory inquiry, brand incident, or procurement audit, ZoikoVertex evidence packages demonstrate governance controls were in place. The cost of a single major brand incident or regulatory fine typically exceeds the annual ZoikoVertex investment. Governance infrastructure is the insurance the business needs.

Request

Approve [AMOUNT] annual budget for ZoikoVertex — governed AI marketing execution infrastructure — commencing [START DATE]. Payback projected within [X] months. Detailed financial model and ROI projection available on request.
