

DEPLOYMENT KIT

LIGHT GATE

AI Agent Deployment Readiness Kit

Pre-launch verification checklist, channel permission matrix, brand voice configuration guide, and post-launch governance monitoring protocol for governed AI agent deployment.

4 CHECKLISTS

MARKETING OPS · IT

LIGHT GATE

2026 EDITION

Who this kit is for

Marketing operations leads, IT deployment teams, and platform administrators deploying ZoikoVertex AI agents for the first time or expanding to new channels or regions. Complete all four checklists before enabling live AI agent execution.

CHECKLIST 1

Pre-Launch Verification — 28 Items

A · Platform Configuration

- ✓ ZoikoVertex enterprise account is active with correct tier, seat count, and workspace configuration.
- ✓ All integration connections (CRM, DAM, social, paid, email, analytics) verified with test events.
- ✓ SSO integration configured and tested. SCIM provisioning connected to HR/identity system.
- ✓ MFA enforced for all user accounts. Emergency access procedure documented.
- ✓ Data residency region confirmed and matching DPA data residency commitment.
- ✓ Retention policies configured per record type, jurisdiction, and contract requirements.

B · AI Agent Configuration

- ✓ AI agent autonomy limits set conservatively for initial deployment — all actions require human review.
- ✓ Agent task scope defined: content types, channels, languages, and markets the agent is authorised to serve.
- ✓ Brand voice configuration loaded: tone, vocabulary, approved claim language, prohibited terms.
- ✓ Compliance policy rules loaded per product category, market, and channel. Test cases run.
- ✓ Risk scoring thresholds configured. High-risk escalation routing to named reviewer roles confirmed.
- ✓ AI model selection confirmed. Model metadata logging enabled for Evidence Vault.
- ✓ No-publish constraint confirmed active: agent cannot activate any content without human approval.

C · Approval Workflow Readiness

- ✓ Approval chains configured per channel, risk level, spend threshold, and content category.

- ✓ All reviewer roles assigned to named users. Backup approvers configured for each role.
- ✓ SLA timers configured for each approval stage. Escalation paths tested end-to-end.
- ✓ Decision Ledger capturing rationale — test approval with rationale field completed.
- ✓ Evidence Vault test: generate content, approve, publish to test channel, verify evidence package seals.
- ✓ Executive Command Center access confirmed for marketing leadership and compliance teams.

D • Governance & Legal Readiness

- ✓ DPA executed and filed. Data protection officer (if required) notified of new AI system deployment.
- ✓ Responsible AI policy communicated to all team members with AI agent access.
- ✓ AI usage disclosure policy documented for any consumer-facing AI-generated content.
- ✓ Post-launch monitoring protocol agreed (see Checklist 4) and owner assigned.
- Incident response plan updated to include ZoikoVertex AI agent failure scenarios.
- ✓ Training completed: all reviewer and approver roles trained on ZoikoVertex workflow.
- Go-live sign-off obtained from: Marketing lead ____ | IT/Security ____ | Legal/Compliance ____.

CHECKLIST 2

Channel Permission Matrix

Define AI agent permissions per channel. Tick the permitted actions for each channel at launch. Expand autonomy as governance matures.

Channel	Generate draft	Auto-schedule	Human approval req.	Policy check req.	Launch status
Social — organic (LinkedIn)	✓	✓	Always	Always	[CONFIRM]
Social — organic (Instagram)	✓	✓	Always	Always	[CONFIRM]
Social — organic (X / Twitter)	✓	✓	Always	Always	[CONFIRM]
Social — paid (Meta Ads)	✓	✗ (human)	Always	Always	[CONFIRM]
Social — paid (Google Ads)	✓	✗ (human)	Always	Always	[CONFIRM]
Email marketing	✓	✗ (human)	Always	Always	[CONFIRM]
Blog / content hub	✓	✗ (human)	Always	Always	[CONFIRM]
E-commerce product copy	✓	✗ (human)	Always	Always	[CONFIRM]
Press releases / PR	✗ (disabled)	✗	N/A — manual only	N/A	Disabled at launch
Regulated channels (FCA/FDA)	✗ (with flag)	✗ (hard block)	Always + legal	Always + legal	[CONFIRM]

CHECKLIST 3

Brand Voice Configuration Guide

[CUSTOMER TO COMPLETE: Fill in your brand-specific values in each field. These are loaded into ZoikoVertex brand policy rules during onboarding.]

Configuration element	Your brand value	Example / guidance
Brand voice adjectives (3–5)	[ENTER YOUR BRAND VOICE]	e.g. "Authoritative, human, direct, optimistic"
Approved tone descriptors	[ENTER TONE DESCRIPTORS]	e.g. "Confident but not arrogant. Clear but not simplistic."
Prohibited vocabulary (list)	[LIST BANNED WORDS/PHRASES]	e.g. "revolutionary, disruptive, game-changing" (banned as generic)
Approved claim language	[APPROVED CLAIM PHRASES]	e.g. "Up to X% faster" not "X% faster" — only with qualification
Brand name usage rules	[NAME USAGE RULES]	e.g. Always "ZoikoVertex" — never "ZV", "Zoiko", or "Vertex" alone
Headline style guide	[HEADLINE RULES]	e.g. Title case for headlines. Max 8 words. No exclamation marks
CTA language approved	[APPROVED CTA PHRASES]	e.g. "Request a demo" not "Get started free" or "Sign up now"
Regional tone variation	[REGIONAL DIFFERENCES]	e.g. UK: more formal. US: more direct. APAC: relationship-first.
Competitor mention policy	[COMPETITOR POLICY]	e.g. Never name competitors. Never use comparative claims in ads
Legal/compliance sign-off req.	[CATEGORIES NEEDING LEGAL]	e.g. All pricing, all performance claims, all regulated category copy

CHECKLIST 4

Post-Launch Governance Monitoring Protocol

Assign owners and review cadences for each governance monitoring activity. All monitoring data is available in the ZoikoVertex Executive Command Center.

Monitoring activity	Owner	Cadence	Alert threshold	ZoikoVertex source
Policy trigger rate	[ASSIGN]	Daily	>15% of outputs flagged	Command Center / Audit Trail
Approval SLA adherence	[ASSIGN]	Daily	>10% breaching SLA	Workflow SLA dashboard
Override frequency	[ASSIGN]	Weekly	>5 overrides / week	Decision Ledger
Evidence completeness	[ASSIGN]	Weekly	<95% campaigns with sealed evidence	Evidence Engine coverage
Agent error / failure rate	[ASSIGN]	Daily	>2% task failure rate	Audit Trail error events
Brand compliance rate	[ASSIGN]	Weekly	<90% first-pass brand compliance	Policy check results
Reviewer workload balance	[ASSIGN]	Weekly	>30 items in one queue	Approval queue dashboard
Regulatory alert review	[ASSIGN]	Weekly	Any regulatory trigger	Compliance alert feed
Executive governance KPIs	[ASSIGN]	Monthly	Board reporting threshold	Command Center KPI export
Autonomy threshold review	[ASSIGN]	Quarterly	Maturity milestone reached	ROI Engine + Audit Engine

Autonomy expansion principle

Start conservatively — every AI agent action requiring human review at launch. Expand autonomy incrementally as governance data accumulates: review policy trigger rates, approval patterns, and error rates after 30, 60, and 90 days. Document each autonomy expansion as a configuration change event in the Audit Trail.
